FEBRUARY 2020

What we have been learning...

Students have loved learning about themselves, their feelings and their five senses! Students practiced complimenting their peers and how we can act in different social scenarios.

Our dramatic play center was transformed into a kitchen, the students favorite play setting! Students practiced setting the table, serving their peers and caring for babies in the home setting. First, our sensory bin was filled with red rice and heart cookie cutters, then we added floating pink and red hearts in water. Students practiced creating patterns, measuring and balancing using candy hearts. A favorite game this month was the Emotions memory game, we played everyday!

In art, we created self portraits, heart process art and all about me rainbows. Student practiced cutting shapes and use an eye dropper to paint.

We completed two science experiments this month. We learned how polar bears keep themselves warm and how candy hearts dissolve in different liquids. Students are now eager to make observations and complete these hands on activities!

Our favorite stories were Pete the Cat Valentine's Day is Cool and Glad Monster, Sad Monster.

THANK YOU!

To all who were able to attend Cupcakes & Crafts as well as sharing a Valentine treat with us! We are so grateful to each of you for spending part of your day with us!
